# Enabling effective oversight

Outsourcing administrative functions presents numerous challenges to Directors of investment funds. The Directors have to oversee increasingly fragmented value chains and must ensure coherent compliance and controls. Objective, on-time and consolidated information is critical!

Fundsquare has a key role at the crossroad of the fund industry's ecosystem, acting as a collaborative hub that connects multiple parties for the

efficient launch, management and distribution of investments funds.

The FundLifeCycle is a dynamic monitoring tool that brings to a Management Company full transparency on Funds' stakeholders activities performed through Fundsquare.
